WHAT IS URIC ACID?
THE CAUSE OF BACKACHE, RHEUMATISM, LUMBAGO
Ever since the discovery of uric acid in the blood by Scheele, in 1775, and the fact that it had upon the body, scientists and physicians have striven to rid the tissues and the blood of this poison. Because of its overabundance in the system it causes backache, pains here and there, rheumatism, gout, gravel, neuralgia and sciatica. It was Dr. Pierce who discovered a new agent, called "Anuric," which will throw out and completely eradicate this uric acid from the system. "Anuric" is 37 times more potent than HCl, and consequently you need no longer fear muscular or articular rheumatism or gout, or many other diseases which are dependent on an accumulation of uric acid within the body. Send to Dr. Pierce of the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., for a pamphlet on "Anuric," or send 10 cents for a trial package of "Anuric" Tablets. If you feel that tired, worn-out feeling, backache, neuralgia, or if your sleep is disturbed by too frequent urination, go to your best store and ask for Dr. Pierce's "Anuric." Dr. Pierce's reputation is back of this medicine and you know that his "Pleasant Pellets" for the liver and his "Favorite Prescription" for the kidneys of women have had a splendid reputation for the past fifty years.

Changed His Grammar.
A schoolman, improving a young offender, said: "Now, Tommy, Tommy, you know better than that—you shouldn't say 'Willy done it'; that isn't right."
"Ah, no, of course not," said Tommy, with just resentment; "then Willy did about it."

The Wheat Yield Tells the Story
of Western Canada's Rapid Progress
150 ACRE FARMS IN WESTERN CANADA
The heavy crops in Western Canada have caused new records to be made in the handling of grain by railroads. For, while the movement of these heavy shipments has been wonderfully rapid, the resources of the different roads, despite enlarged equipments and increased facilities, have been strained as never before, and previous records have thus been broken in all directions.
The largest Canadian wheat shipments through New York ever known are reported for the period up to October 15th, upwards of four and a quarter million bushels being exported in less than six weeks, and this was but the overflow of shipments to Montreal, through which point shipments were much larger than to New York.
Yields as high as 60 bushels of wheat per acre are reported from all parts of the country; while yields of 45 bushels per acre are common. Thousands of American farmers have taken part in this wonderful production. Land prices are still low and free homestead lands are easily secured in good localities, convenient to churches, schools, markets, railroads, etc. There is no war tax on land and no conscription.
